Rebecca (all),

I've been called to Washington to meet with the president in the oval office today about economic issues. Its about the only thing that would trump my being there today for our meeting/update. The meeting will go forward as planned in my absence and I hope we can touch base later to share thoughts and more.

Thanks,

Cory

Jack-

Now that we have moved past the announcement of Newark's PEN Fund and the \$100 million matching grant from Mark Zuckerberg, I wanted to take a moment to thank you and the Square team for all of the amazing work you have done on the www.squareup.com/newark site. We are deeply honored to be working with you on this donation system, and have been inspired by the dedication of your team. It is extraordinary that so many of your employees worked round-the-clock to create this system for Newark. We are overwhelmed and grateful.

I want to extend the gratitude of our entire community, as this consumer donation mechanism empowers Newark – now and in the future – to mobilize the “grass roots” of the global Web to support our public schools.

While I know this past week has been full of twists and turns, I cannot express how impressed we have been by you and your team's dedication and flexibility. Your willingness to roll with the punches and stay focused on the kids at the end of this donation system has been inspiring to everyone who has worked on this initiative and announcement.

When we move past the fervor of the hectic early days of this initiative, my team and I look forward to re-focusing on Square. We believe in the potential of what you have built for us, and we want to work with you to leverage this system to its fullest potential.

Thank you, again, for your leadership, dedication, hard work and absolute grace. It is such an honor to be a partner.

Cory

I like this a lot

Cory -- can you get us comments on this today? We should have a draft to send the governor by tomorrow

My one question is whether for local purposes, there is too much "national" language in here. I wonder if we should basically make this focused on Newark with just a touch of "and this will be a national model"

Subject: Proposed Revisions to press release
Importance: High

With Sheryl's encouragement, my team took the liberty of proposing a substantially revised press release to:

--reorganize to highlight the actions of the Governor and Mayor (since this is your announcement)

--clarify the commitments being made by each party. (note that I've put much of this language in brackets since the details are obviously up to you).

-- highlight the objectives of the initiative with greater specificity

-- employ language that national polling suggests resonates well with a mass audience, without alienating potential adversaries.

We've limited our comments on the quotes from the Governor and Mayor, since these obviously are designed to be in their own voices — we're happy to offer suggestions here as well if you'd like.

Our goal is to better explain objectives and avoid hot-button words if we can, and use more personal, less abstract, language to emphasize the potential benefits-- success for students, rewards for teachers, improvements to schools, etc.

Of course this is a draft, and we welcome your comments and suggestions.

thanks

Subject: Re: NEYDF Action Plan

The Broad folks were very interested in knowing who the Superintendent is going to be.

Bill Ackman of Pershing Square put up the initial \$100k to get us going (and this is a good start) and we are hopeful that he will act quickly either on his decision to commit to the Fund (we think his number is \$25M and we are presenting to his board next Thursday) and will put up his first \$5M right away or else we can some additional money from him to get this piece going (as well as to fund the operating expenses). He gets it.

CDF is not doing this -- sorry if there was confusion somewhere along the way. There a few firms who do this piece well and we are getting proposals. The organizing involves focus groups, polling and grass roots on the street activism, mailings, etc. Will get you more detail on budget but we agree that this is the most critical piece right now. They have done it brilliantly up in Harlem.

Sent: Tue Sep 14 08:48:08 2010
Subject: RE: NEYDF Action Plan

What do you mean by superintendent?

On fundraising, I think the priority is getting someone on board before the announcement to pay for the community awareness piece. This piece is so critical. Can you tell me:

- Who the possible donors are for this and the plan to reach out to them?
- More details on why it costs so much to do the community organizing? (for example, in one deck I saw the children's defense fund listed as a possibility to do this? Maybe I misread. But I worked there and as far as I know, they don't do this at all)

Cory & Bari,

Mark and I will be in NY on Monday 9/27. Mark is speaking at NBC thing that morning. After this, if you want us to, we are happy to do a meeting with potential investors -- either a late coffee or early lunch. You would organize it and invite people. (I would bet someone is happy to host it in their office so it is private. In case there is an issue of cost, I can cover this personally so don't worry about cost here.)

Anikka can give you times to make this happen if you are interested. Mark will fly out right after this so timing will be important.

I think this is a good opportunity ☺

Subject: FW: Immediate capital needs

In terms of the budget, this is a back of the envelope 3 month budget Mayor and I did several weeks ago. DW, I know that you have spoken to communications firms and probably have more up to date numbers but thought this would be a place to start:

\$75,000 -- development of collateral material and mailings
\$50,000 -- poll/focus groups
\$75,000 -- community organizing
\$75,000 -- consultants (this envisioned BJM and DW)
\$25,000 -- communications consultant
\$15,000 -- fundraising expenses
Total -- \$315,000

We had asked Ackman for \$350,000 to cover any other expenses that arose.

Since doing the above, I think that we need to add some operational expenses (technology, branding, office, etc.) and additional consultant (I would like to keep Patsy on to help for the next few months).

I am working on the assumption that by January 1, this is up and running and there is a Superintendent on board.

DW, if you like, I can come to Newark tomorrow morning to discuss and work this up before I have to be at the airport at about 1. Let me know what works for you. I am happy to drive the non-community engagement part of the budget numbers if you like.

To: Sarah Ross; mayor@bookerteam.com
Cc: [REDACTED]
Subject: RE: urgent

Hi, Sarah -- I completely understand what Facebook wants to do and want to find a way to get there quickly. My concerns with NEYDF are two-fold: one is management and administration -- the consumer match account would not solve this as they are still donations to NEYDF that have to be accounted for, reported, etc. We set up a very lean organization -- long on program support and working with our grantees but not set up with the infrastructure to be the type of organization that collects these kind of gifts.

Even more importantly (and compellingly, I think) is that, in my experience, donors (large and small) like to know where their money is going. If I had \$100, I would not begin to think that it could begin to make a difference in a \$250 million initiative and might not even bother to make the donation. It would just seem like money going into a dark hole. If I, for \$100, could fund half of a class trip or a science project, that would jazz me -- and likely would make me return often if I had an extra \$25 to find something else. And, as Mark's money is not going directly in to the classrooms, this is another benefit of creating a Donors Choose type project.

As you have been working with Donors Choose, you know that \$5 or \$10 matters -- people like and feel that. That won't be the case with NEYDF. That's why I'd like to go with something like Donors Choose -- and Mark can include this towards his match (or not).

Subject: RE: urgent

Hi Bari - quick question (not being an expert in New Jersey-based micro-transactions/fundraising) - would the administration of a consumer match be possible by segregating the funds? For example, holding out \$5 million as the "consumer match" account, and working with a third-party (i.e., Kiva or Causes) that specializes in micro-donations to administer the match, etc.? Would segregating the funds help overcome the backend challenges of fund administration?

Just brainstorming here ... as Facebook would love a recommendation for engaging real world consumers who want to match Mark's contribution \$5 to \$10 at a time.

Sent: Sat Sep 18 14:32:30 2010
Subject: RE: urgent

Hi guys - I have dropped the Facebook team on this response (Newark team only)

Elliot called me this morning. This community donation mechanism is super important to Mark and Facebook - as they believe a large number of people will want to contribute to trigger the match. They believe it's bad positioning for Mark if only higher end donors are able to contribute to the matching funds in large chunks.

While I am not an expert on the tax or legal implications of taking in micro-donations for a New Jersey-based non-profit organization, I do know we have access to a huge community of developers who will work with us to create a transaction solution. It is important we activate this group today - or they will not have enough time to build and test a platform that would be ready for The Oprah Winfrey Show. Solutions include:

- Jack Dorsey and Square - consumer merchant platform (open web)
- Sean Parker and Causes - 130 million member app on Facebook that connects microtransactions (downside - Causes only works on Facebook)
- Reid Hoffman and PayPal - universal payment system (open web)

Charles Best and DonorsChoose - we could create a Newark-specific donation system, however this may not be big enough. All of the Newark school projects could be funded for \$62,000 (that would fund everything), and those dollars are too small for what Oprah/Zuckerberg/Booker/Christie could raise on Friday

Dan Rosensweig and Chegg - Chegg is a massive transaction platform that should be able to extend to donations (would require a discrete account on the back end)

Google - Google payments could work (we would work via Elliot's network)

Kiva - Kiva is another platform that would work (we would work via Ron Conway and Reid Hoffman's networks)

From my perspective, our best solution here is Jack Dorsey, as his solution is universal and does not require a Facebook log-in to access. Given that Jack invented Twitter, it is a wonderful industry message to see the creator of Facebook and the creator of Twitter working together for Newark (it's the Valley's version of a bipartisan collaboration, etc.).

We are going to need to sync on feedback for Facebook on this point (above) this weekend. Consumer donations is a hot button for them right now.

Subject: RE: urgent

There is a NJ non-profit corporation established but IRS application is pending completion -- can definitely receive funds. However, we did not envision NEYDF taking in lots of small contributions -- that could be very cumbersome. Instead, what has been discussed is creating something like Donors Choose for Newark only so that people could support this effort directly through projects in the schools. I am sure we can get a web page created but the issue is having the teacher-identified projects ready to go. I will discuss on our side on status of this.

Subject: Re: TIME SENSITIVE - need coordinated recommendation out to Facebook by 8:00 p.m. TONIGHT

DW, I concur wholeheartedly for a number of reasons:

1. Donors of this size will be much more likely to give where they see tangible connection -- \$50, \$100, etc. In a \$250M fund will strike most as irrelevant and not worth it. They will feel much better if they know they are making a difference.
2. MZ's money is not going in to classrooms -- we will get a lot of local props for doing it this way. Will help with community piece.
3. With \$65,000 of projects in Newark, we can create real excitement about this if these projects get quickly funded. I hope to be pleasantly surprised but I don't think we are looking at millions of dollars here. Mayor's tweets about his re-election efforts netted about \$2000.
4. MZ can decide that this goes against the match -- completely his decision. We would still commit to raise the \$100M as I believe the consumer piece will be relatively immaterial.
5. NEYDF has not been designed to take small gifts. The generation of the receipt is but one part of it. We are not the United Way.

Talk later.

I like DonorsChoose. It gives donors opportunity to fund something tangible, has built-in response mechanism (notes from kids) and drives resources directly to Newark classrooms through our teachers (a critical group to our efforts). Sends a great early message.

Sent: Sun, Sep 19 18:22:01 2010
Subject: TIME SENSITIVE - need coordinated recommendation out to Facebook by 8:00 p.m. TONIGHT

Hi Team Newark:

We need to have a coordinated recommendation out to Facebook by 8:00 p.m. EST tonight on how Newark will manage the consumer donation channel to trigger Mark's matching funds. This component of the fundraising effort is critical to Facebook, and the Facebook team is expecting a recommendation from us quickly. The deadline on this decision is being driven by the technical team at Square, who are mobilizing to build for us. They are staffing on a 24 hour system (literally round the clock) to build a system for Newark, and if they do not begin working tonight - they will not have enough time to make the system operation for Friday's Oprah appearance.

I have worked very quickly and diligently this weekend to surface two solutions for evaluation.

SOLUTION #1 = DonorsChoose

PROS TO THE DONORSCHOOSE SOLUTION

- DonorsChoose is happy to host a Newark-specific promotion from the DonorsChoose home page, to drive donations into funding Newark classroom projects.
- DonorsChoose will build a Newark-specific landing page (with a dedicated URL) to further surface and capture engagement with the Newark classrooms.
- DonorsChoose has a scalable platform, and consumer donors receive a direct (and heartwarming) connection to the classroom they are funding - thank you notes from the teacher, students, etc., etc.
- DonorsChoose has a large base of teacher users in Newark who could submit hundreds of project requests (such that the bulk of Oprah-inspired donations would go directly to Newark classrooms) ****IF**** Oprah would give a green light to do Newark teacher outreach at least a couple days before the show.

CONS TO THE DONORSCHOOSE SOLUTION

- Funds raised would go to DonorsChoose, and would not trigger Mark's match (as I understand the matching system) - as the funds are not hitting the Newark Ed Fund 501 (c)(3) bank account.
- Oprah's viewers would have a range of schools to donate to on the DonorsChoose web site - and while money would flow into Newark, it would flow to other schools in need across the country.
- There are 35 Newark classroom projects active on DonorsChoose.org at this moment and, to date, 450 classroom projects from Newark teachers have been funded over the last few years.

- It would take \$60,000 to fund all of the classroom projects in Newark that are currently open (the scope may be too small for the power of Oprah and Zuckerberg, etc.).

SOLUTION #2 = SQUARE + AMAZON

PROS ON THE SQUARE + AMAZON SOLUTION

- Jack Dorsey and a group of engineers from Amazon and PayPal will build a dedicated page for Newark on Square (will live under the URL www.squareup.com/newark).
- This dedicated page will give consumers the ability to directly contribute to the Newark Ed Fund through two mechanisms.
- Consumers can donate ONLINE via Amazon's merchant platform (the world's largest database of credit cards); with an integration of Amazon's "one click" system (so if you have an Amazon account already, you can donate with one click).
- Consumers can donate OFFLINE via Square—volunteers with Square readers can be out in the streets of Newark, in Apple Stores, at Facebook's headquarters—anywhere—taking donations via Square (www.squareup.com).
- All donations can be taken with the full registration system required for tax exempt notifications, etc.
- The Amazon and Square merchant platforms will be backended by the Newark Ed Fund bank account.
- A data base of all donors will be created.
- The platform is extendable to other uses— it is the basis for the "real time fundraising engine" we have discussed for some time.
- The Newark schools in the DonorsChoose system could be integrated in the Square page with a promotional module that links over to www.donorschoose.org/.
- This solution will scale—in the event 10,000,000 people want to donate \$5 a piece (will match Facebook's scale).

CONS TO THE SQUARE + AMAZON SOLUTION

- There will be a data base to manage (this probably will require a resource, something that Amazon might be able to help staff).
- We will need legal and policy due diligence around taking in micro-transactions (similar to all political fundraising and charitable fundraising online—but, standard for the web as well).

We are going to need to determine how to move forward tonight—as we need to cover off Facebook and get the team at Square or DonorsChoose working on a build for us. As we technically only have 3 days of technical build time (as we need to allow 24 hours for load testing), work needs to begin tonight.

Bari and Cory—I need your input to proceed. My gut is that Facebook will love the Square + Amazon solution—as it's 1) grassroots, 2) will work online as well as offline, and 3) it can scale as big as Facebook (if needed).

Subject: RE: urgent

Hi, Sarah -- I completely understand what Facebook wants to do and want to find a way to get there quickly. My concerns with NEYDF are two-fold: one is management and administration -- the consumer match account would not solve this as they are still donations to NEYDF that have to be accounted for, reported, etc. We set up a very lean organization -- long on program support and working with our grantees but not set up with the infrastructure to be the type of organization that collects these kind of gifts.

Even more importantly (and compellingly, I think) is that, in my experience, donors (large and small) like to know where their money is going. If I had \$100, I would not begin to think that it could begin to make a difference in a \$250 million initiative and might not even bother to make the donation. It would just seem like money going into a dark hole. If I, for \$100, could fund half of a class trip or a science project, that would jazz me -- and likely would make me return often. If I had an extra \$25 to find something else. And, as Mark's money is not going directly in to the classrooms, this is another benefit of creating a Donors Choose-type project.

As you have been working with Donors Choose, you know that \$5 or \$10 matters -- people like and feel that. That won't be the case with NEYDF. That's why I'd like to go with something like Donors Choose -- and Mark can include this towards his match (or not).

Subject: RE: urgent

Hi Bari - quick question (not being an expert in New Jersey-based micro-transactions/fundraising) -- would the administration of a consumer match be possible by segregating the funds? For example, holding out \$5 million as the "consumer match" account, and working with a third-party (i.e., Kiya or Causes) that specializes in micro-donations to administer the match, etc.? Would segregating the funds help overcome the backend challenges of fund administration?

Just brainstorming here . . . as Facebook would love a recommendation for engaging real world consumers who want to match Mark's contribution \$5 to \$10 at a time.

Subject: RE: urgent

Hi guys - I have dropped the Facebook team on this response (Newark team only)

Elliot called me this morning. This community donation mechanism is super important to Mark and Facebook - as they believe a large number of people will want to contribute to trigger the match. They believe it's bad positioning for Mark if only higher end donors are able to contribute to the matching funds in large chunks.

While I am not an expert on the tax or legal implications of taking in micro-donations for a New Jersey-based non-profit organization, I do know we have access to a huge community of developers who will work with us to create a transaction solution. It is important we activate this group today - or they will not have enough time to build and test a platform that would be ready for The Oprah Winfrey Show. Solutions include:

- Jack Dorsey and Square - consumer merchant platform (open web)
- Sean Parker and Causes - 130 million member app on Facebook that connects micrortransactions (downside - Causes only works on Facebook)
- Reid Hoffman and PayPal - universal payment system (open web)
- Charles Best and DonorsChoose - we could create a Newark-specific donation system, however this may not be big enough. All of the Newark school projects could be funded for \$62,000 (that would fund everything), and those dollars are too small for what Oprah/Zuckerberg/Booker/Christie could raise on Friday
- Dan Rossensweig and Chegg - Chegg is a massive transaction platform that should be able to extend to donations (would require a discrete account on the back end)
- Google - Google payments could work (we would work via Elliot's network)
- Kiva - Kiva is another platform that would work (we would work via Ron Conway and Reid Hoffman's networks)

From my perspective, our best solution here is Jack Dorsey, as his solution is universal and does not require a Facebook log-in to access. Given that Jack invented Twitter, it is a wonderful industry message to see the creator of Facebook and the creator of Twitter working together for Newark (it's the Valley's version of a bipartisan collaboration, etc.).

We are going to need to sync on feedback for Facebook on this point (above) this weekend. Consumer donations is a hot button for them right now.

There is a NJ non-profit corporation established but IRS application is pending completion -- can definitely receive funds. However, we did not envision NEYDF taking in lots of small contributions -- that could be very cumbersome. Instead, what has been discussed is creating something like Donors Choose for Newark only so that people could support this effort directly through projects in the schools. I am sure we can get a web page created but the issue is having the teacher identified projects ready to go. I will discuss on our side on status of this.

I'm adding Randi Z from our side and Sarah R from Cory's team

They are well placed to propose ideas on how we handle the funding logistics - if someone can tell them who should receive the funds (NEYDF or another entity)

We should be able to help here - though I caution that I do NOT want this to be perceived in any way as an attempt to showcase (or require or favor) the use of Facebook to attract donations

On 9/18/10 9:03 AM, "Sheryl Sandberg" <sheryl@facebook.com> wrote:

URGENT - As Jen points out, having the ability for citizens put in funds to help match Mark's money is fantastic. Oprah is the day to do it.

- 1) Is the NEYDF foundation legally established?
- 2) Can we have a website up and running so it can take donations from citizens by Friday?

This could be huge. Bari - can this get done?

Attachments: AnnouncementDraft-9-17pm.doc
Importance: High

Not sure who is collecting our thoughts on this but here are a few comments:

1. Name of fund is Newark Education and Youth Development Fund 2. Fund's goal is to not solely to attract contributions to match MZ's funds. Its mission is to create a national, replicable model for educational and developmental success by achieving systemic reform in Newark that results in demonstrable high achievement for all youth -- to achieve its mission, it will need to match MZ's support and raise additional funds. Obviously, need to shorten that but think it needs to be made clear that it is not solely a fundraising initiative.

Subject: Proposed Revisions to press release

With Sheryl's encouragement, my team took the liberty of proposing a substantially revised press release to:

- reorganize to highlight the actions of the Governor and Mayor (since this is your announcement)
- clarify the commitments being made by each party. (note that I've put much of this language in brackets since the details are obviously up to you).
- highlight the objectives of the initiative with greater specificity
- employ language that national polling suggests resonates well with a mass audience, without alienating potential adversaries.

We've limited our comments on the quotes from the Governor and Mayor, since these obviously are designed to be in their own voices - we're happy to offer suggestions here as well if you'd like.

Our goal is to better explain objectives and avoid hot-button words if we can, and use more personal, less abstract, language to emphasize the potential benefits-- success for students, rewards for teachers, improvements to schools, etc.

Of course this is a draft, and we welcome your comments and suggestions.

thanks

e

Peter is the communications chief for Arne Duncan and has some excellent ideas about how you all might want to position the announcement and reach out to the unions. He's also indicated that we should be able to get strong words of support from Arne both on the Oprah show (where he is set to participate by satellite) and in NY on Monday (when he will announce the administration's teacher initiative). He's also offered to pass along the names of folks at the White House who are preparing the President for his comments Monday morning, so that we might get some favorable mention from him in his remarks.

Peter, DeShawn and Bari are Cory's brain trust for this project and, with Cory, would be grateful for suggestions or advice.

Thanks to all

I will let you speak to this but I think that commitment is way too small and I wouldn't bother. It will get lost in the announcement particularly if including Doerr gift and maybe Ackman. Maybe better to announce Sat if we decide to do at all. \$1 M as a collective gift over 5 years is just too insignificant for this group.

Subject: Idea from ray chambers - raise the first \$1 million from newark community

Hi guys:

I just received an interesting call from Ray Chambers office.

Ray is standing by to help pull together the first \$1 million to trigger a match - from the Newark community = MCJ, Prudential Foundation, etc., etc.

Potentially, this money could be committed before the Oprah Winfrey Show, to demonstrated Newark's leadership in raising the first \$1 million for the match - so Newark is demonstrating early leadership in the matching process, etc.

Ray and team are motivated to help pull this together, if this idea is on strategy, etc. from a Newark perspective.

Wendy McWeeney from Ray's office called me on this - this morning.

Attachments: Final Discussion 2010 Sept_NEYDF_.pdf; August 2010 NEYDF Op Model.pdf

Good morning, Sheryl. As you discussed with Mayor this morning, I am attaching the Newark Education and Youth Development Fund Discussion Document that was prepared in concert with McKinsey – this was sent to Ted and Elliot last week. I am also attaching the more detailed Operating Plan also prepared with McKinsey which has not previously been sent to Ted and Elliot. The spreadsheet will be sent under separate cover.

I will look forward to speaking at 3 pm PST – I know that your time is limited but think the agenda is focused. There seem to be a number of different conversations/meetings that need to occur – legal, McKinsey, etc. I am sure that following our call, we can get them set in very short order.

Thanks, Sheryl.

Thanks, Sheryl.

As an update on Broad, per latest conversation yesterday afternoon, we know that he is very interested in the Fund and is particularly interested in superintendent so will get back with him post-Sept 24.

On Oprah, ask has been made with no response either way -- so this means no or that, as Gayle King said, she loves a surprise -- if no surprise, she will come off the list I fear.

Thanks for help with Doerr -- let me know if you need me to send anything to them.

Thanks much.

Bari

The Broad folks were very interested in knowing who the Superintendent is going to be.

Bill Ackman of Pershing Square put up the initial \$100k to get us going (and this is a good start) and we are hopeful that he will act quickly either on his decision to commit to the Fund (we think his number is \$25M and we are presenting to his board next Thursday) and will put up his first \$5M right away or else we can some additional money from him to get this piece going (as well as to fund the operating expenses). He gets it.

GDF is not doing this -- sorry if there was confusion somewhere along the way. There a few firms who do this piece well and we are getting proposals. The organizing involves focus groups, polling and grass roots on the street activism, mailings, etc. Will get you more detail on budget but we agree that this is the most critical piece right now. They have done it brilliantly up in Harlem.

What do you mean by superintendant?

On fundraising, I think the priority is getting someone on board before the announcement to pay for the community awareness piece. This piece is so critical. Can you tell me:

- Who the possible donors are for this and the plan to reach out to them?
- More details on why it costs so much to do the community organizing? (for example, in one deck I saw the children's defense fund listed as a possibility to do this? Maybe I misread. But I worked there and as far as I know, they don't do this at all)

There is a NJ non-profit corporation established but IRS application is pending completion -- can definitely receive funds. However, we did not envision NEYDF taking in lots of small contributions -- that could be very cumbersome. Instead, what has been discussed is creating something like Donors Choose for Newark only so that people could support this effort directly through projects in the schools. I am sure we can get a web page created but the issue is having the teacher identified projects ready to go. I will discuss on our side on status of this.

Subject: Donation EOD Coverage Report

Hi all,

There are over 100 articles today, bringing the total to over 250 about the donation news, with more consumer press like Entertainment Weekly and People writing. Coverage is mostly now recapping the Oprah segment, highlighting Mark's quotes on the movie and education and describing the first look in to his modest life while continuing to note he wanted the donation to be anonymous.

Some stories cited that Twitter's co-founder Jack Dorsey's start-up, Square set up a website for people to donate and that Jack gave a \$5,000 donation to Newark schools with his American Express card. Overall the coverage and tone is generally positive -- reflecting that though the donation could be seen as trying to thwart a negative image of Mark from the movie, it doesn't matter and this is a really commendable donation.

The video of Oprah on Vimeo has seen more than 2,000 views in 5 hours.

We'll continue to track and send a report Sunday evening with the latest coverage.

Best,
Victoria

Dear FNF Board,

In advance of tomorrow's FNF Board Meeting, please find enclosed the agenda and budget materials that will be discussed during the meeting. We will provide printouts of all the materials at the meeting.

Time: 1:00pm - 3:00pm

Location: McCarter & English Office, Haring Conference Room
100 Mulberry Street
Four Gateway Center, Newark

Dial-In: 888-666-7813

Passcode: 12717

Kind regards,

Paul

Cynthia and Rajeev -

I second all that Chris said - thanks to you for your incredible work, amazing fact finding and analysis, strategic thinking and the hard work to line up many possible powerful actions for Cami to choose to take or not to.

We really appreciate the Incredible management task it was, as well, as you kept all of the work streams moving in individual but aligned ways.

Thanks for all of your insight, expertise and vast contributions. NPS and the whole effort are at a very different place because of your work!

Jen

On Wed, Jun 22, 2011 at 6:30 PM, Chris Cerf <[redacted]@gmail.com> wrote:
 You guys are absolutely amazing. The world may never know or appreciate what you accomplished between last December and the transition to Cami. I know we have a few stripes on our back from the press and even some elements of the community. Without any exaggeration, however, this effort saved the district from complete meltdown, enabled an orderly transition to Cami's amazing leadership, and avoided a "lost year" in the reform effort. You should be extremely, extremely proud, and I am forever grateful.

Best,

Chris

Transition support project team update

June 22, 2011

We hope this note finds everyone well.

We wanted to take a moment to provide a brief update on the transition team work and status now that Cami is in place as the strong, effective and

empowered leader we have all been waiting to start!

It has been an exciting few weeks with so many steps to strengthen NPS for the 2011-12 school year being refined, finalized and activated. NPS is on track to achieve the project's goals of "not losing a year" and enabling the new superintendent to hit the ground running. This reflects hard work and unique collaboration by the State, City, FNF and other funders and NPS staff.

Transition Support Team Focus

Over the past month we have briefed Cami, particularly in the areas where critical, immediate decisions were needed for the 2011-12 school year, and focused the team on informing those decisions and on high quality execution. Despite the short time frame, NPS is taking bold steps toward more effective teachers and principal control over their staff (aka "mutual consent"), higher quality school options for students --new NPS schools and charter schools leasing space, stronger school leaders, earlier and higher quality teacher recruitment, rigorous innovation to model expanded learning time and successful school opening.

We expect that in July, Cami and her senior team can turn some attention to longer term planning and strategic priorities. We are scheduling several blocks of time to share the fact base and discuss our findings, options and recommendations in the areas of accountability, special education and struggling learners (with DMC), financial reengineering, portfolio evolution (with Bridgespan), data quality, parent engagement and talent management system improvements. We intend these briefings to support development of the plan going forward and envision one or more working sessions for synthesis and supporting that goal, as helpful.

Transition Support Team Structure and Deployment

As the work transitions to the next phase, the transition team in its current configuration is disbanding and ongoing support is emerging in three

key buckets of work:

Bucket 1: Superintendent On-boarding: This includes supporting Cami's critical near term needs including interim chief of staff (All) overseeing communications, executive staffing, executive management, priority setting/calendar and decision support, tapping multiple project team's input as needed.

Bucket 2: Embedded Operational Priorities: These projects have capable project leaders and defined scope. Execution is underway and the work needs to report to Cami for timely and aligned decisions. Major workstreams are talent, especially principal and teacher recruitment and selection activities and the mutual consent initiative, successful school opening, new schools launch and school colocations execution, especially establishing protocols and relationships at the building level.

Bucket 3: Strategic projects: These projects remain in the diagnostic and incubation stage pending briefings with, and decisions by, Cami as to what she wants to activate. We envision some of these projects becoming embedded operational priorities (bucket 2) once an owner and implementation parameters are set.

We are available to support and provide any context necessary, but will play a less formal connective tissue or oversight role as Cami and her leadership team snap into place. If we can be helpful structuring and scoping NPS' forward plan and any next phase projects, we are happy to do so.

Most project team members are excited to continue working at NPS in either a project or staff role, should that fit with Cami's overall staffing plan. In addition the team's work has engaged many NPS staff members in ways that have built capacity, especially for cross-functional problem solving (a new skill for NPS).

Funds

Grants funds supporting June through September support have been allocated back to Greg/FNF for any proposed new scope. We have managed resources well under proposed budget with the goal of ensuring every dollar spent was serving only critical priorities. With the June through September budget, there is enough funding to support all the currently defined work without any new allocation of funds. The larger ticket next phase items (e.g. due diligence audit, root and branch financial analysis/reengineering, special education recommendations implementation) may require additional funds/grants, although some could be at least partially supported within the existing grant.

Several items FNF may want to review at the June 28 meeting include: Mutual consent, Expanded Learning Time pilot, the Strategic Resource Review scope and service provider, the Due Diligence audit and New Schools.

The attached document summarizes the current team structure and work as well as updates the team's outcomes over the past few months.

It has been an incredible, non-linear, immensely humbling and rewarding experience for us to support you all in this work and we are very hopeful that the efforts of our team will and have had meaningful impact for Newark children next year and beyond.

All best,

Rajsev & Cynthia

Yikes - somehow this email got lost in my inbox.

Let me add to the loud chorus of thank yous. A VERY LOUD THANK YOU - smile. From moral support to great thinking to operational assistance - quite simply - my entry to NPS would have dramatically different if it were not for the two of you and your team. To a person, I have found all of you to be mission-driven, committed, open, competent, and incredibly dedicated. Thank you 1000 times over.

By early July, I will have a clear sense of who is staying on, doing, what, and how (e.g., continuing on at NPS, moving on, or serving in a consulting capacity to NPS from a different entity).

In the meantime, I am going to send dates for a celebratory beverage. I am big on marking important milestones.

Subject:

Cami, Chris and Greg,

I can't tell you all how excited I am to - with your arrival - start a new educational era in Newark.

It is so critical, especially in the coming months leading into September that our four leadership roles are working in sync (not the 90s group Chris) in the most optimal way possible. We have great challenges and opportunities before us and our leadership quartet can ensure that all challenges are met and opportunities seized.

To that end, I want to start working on a schedule of regular meetings - I am suggesting in the beginning we meet as close to once a week as possible.

Sharon on my team (copied here along with Jarrad) will lead in schedule coordination. Chris, she knows the drill with you. But Cami and Greg, if you can instruct Sharon how best (or who best) to pin down dates between now and September.

Thanks, please let me know any other thoughts or input regarding this.

Cory

Dear FNF board

Please find attached the final draft press release announcing Greg's appointment to FNF -- prepared by Dave Nachtweih.

With the Superintendent announcement behind us (and many congratulations to Cami and all managing it for the positive messaging), we plan to release this early this week. This is subject to any last minute changes depending on the daily coverage re Cami and other issues.

The aim is for a 'factual' statement of what is happening, in part to be ahead of the rumor mill that will soon translate into a leaked story about Greg if we are not ahead. The risk is that the story is spun as "Secretive FNF hires an outsider" if we are not seen to be transparent.

In making this announcement, however, we will be frustrating anyone clamoring to talk to Greg before he starts on June 13. We (and Kellogg if they are approached) will have to be clear that Greg is not available in the interim, and he looks forward to connecting with the community and press once he's on board. There is some downside to that, but we believe that is a price worth paying.

Please let me know if you have any questions or comments.

<[REDACTED]@gmail.com>, Kuelli George <kuelli@startupeducation.org>

Thanks Shavar.

We definitely agree that some of Startup Education's grant will be well used to help launch the new school models.

In fact, through Foundation for Newark's Future (FNF), we as a board just last week made grants for the intensive "planning/startup phase" leading up to July 1 for the five schools that applied - Bard, HMI/Sakla Gunn, YouthBuild/Newark Leadership Academy, STEAM and Bridges and we also invited them to apply for additional startup grant funding for the first year(s) as there is usually a gap in funding before they get to scale. We expect to get these requests within a few weeks.

We are also encouraging the schools to approach other foundations/donors to try to build their funding base, and it is clear that there is a gap that NPS is funding as well, so ultimately money is coming from several sources. We researched how other cities have done funding for launching new schools, and it is usually through a mixed model like this of some external funding and some district funding as the schools get up to scale and can be self sustaining.

As point for all of this work, Dan Gohl has the most information on the balance of all of this.

I am happy to talk more about this, and Jarrad has also been part of helping get the new schools going.

Best, Jen

On Sun, Mar 27, 2011 at 2:32 PM, <shavar.jeffries@[REDACTED]> wrote:
Jen and Kuelli,

I hope all is well. I'd love to catch up soon. I'd also love to find a time as soon as possible to discuss whether some of the Zuckerberg grant may be used to fund some of the new high school programs. These sort of innovations seem to be the kind contemplated for the funds, as these programs are small and could use start-up incubation funding until they reach scale. The use of external funding to support incubating new innovations also makes sense given the large deficit the district faces, which makes it harder to small-school innovations that aren't financially self-supporting. Would love to discuss this soon, even by phone.

Best, Shavar

Are these funds that we can bank at this point so as to reduce the number of layoffs? And can we also get a commit to fund the actual operation of the programs, which would also reduce layoffs? The district's budget currently incorporates funds for these schools, because they are not self-supporting until they reach scale. Small programs such as these are easier to justify in the pre-scale period to the degree external funding is used to get them up and running. Some are opposing launching these schools for these reasons, and this sort of scaling-up incubation seems like a perfect use of the external funds. As I understand it, the district is investing a couple million to jump-start these programs, and it would be helpful to save teachers to the degree foundation funds can help bridge the gap.

Related set of questions I have is what is the decision-making process for the expenditure of Startup and FNF funds? This remains a black hole to me, and thus I suspect everyone. I'd like to know how funding decisions are being made, who's at the table when they're being made, and how all of this is tied into district decision-making and planning.

I appreciate any insight you can provide on these questions.

Best, Shavar

Shavar -

I think Valerie Wilson and/or Dan Gohl can answer the new schools budgeting questions better than I can as they have been involved in all of the different pieces of it and we have focused on the amount requested of FNF, and as I wrote, my understanding is that there are parts projected to be funded by philanthropy and parts by the district as is usually the case with new schools before they reach scale. They have the numbers for the projections for the district budget.

In terms of the way funding is proceeding, Startup Education is working as much through FNF as possible. I'll try to get you more info on that process soon.

I think we will move ahead with the meeting Chris but I think it would be very productive to schedule a time where you can meet with the board. We need to work on getting our bold outcome measures done and work with the board in discussing what are the major investments we see for the future. You have invaluable experience and ideas in the potential teacher's contract investment, technology investment, and other investments that paid extraordinary dividends in New York and beyond. We can have a good conversation on Friday but I personally feel you are necessary in helping us as a board move forward and achieve our ambitious goals.

Low
Booker

Thanks to you all for this great update.

It would be helpful if you could share with the FNF board any landscaping/national evidence in the innovation area, as well as your briefings on Special Ed. If we can have preliminary conversations about what the evidence shows will work most effectively, later decisions to implement will be much easier (and quicker).

NEWYDF: Discussion Document

Newark Education & Youth Dev
September 2010

Newark youth face significant challenges

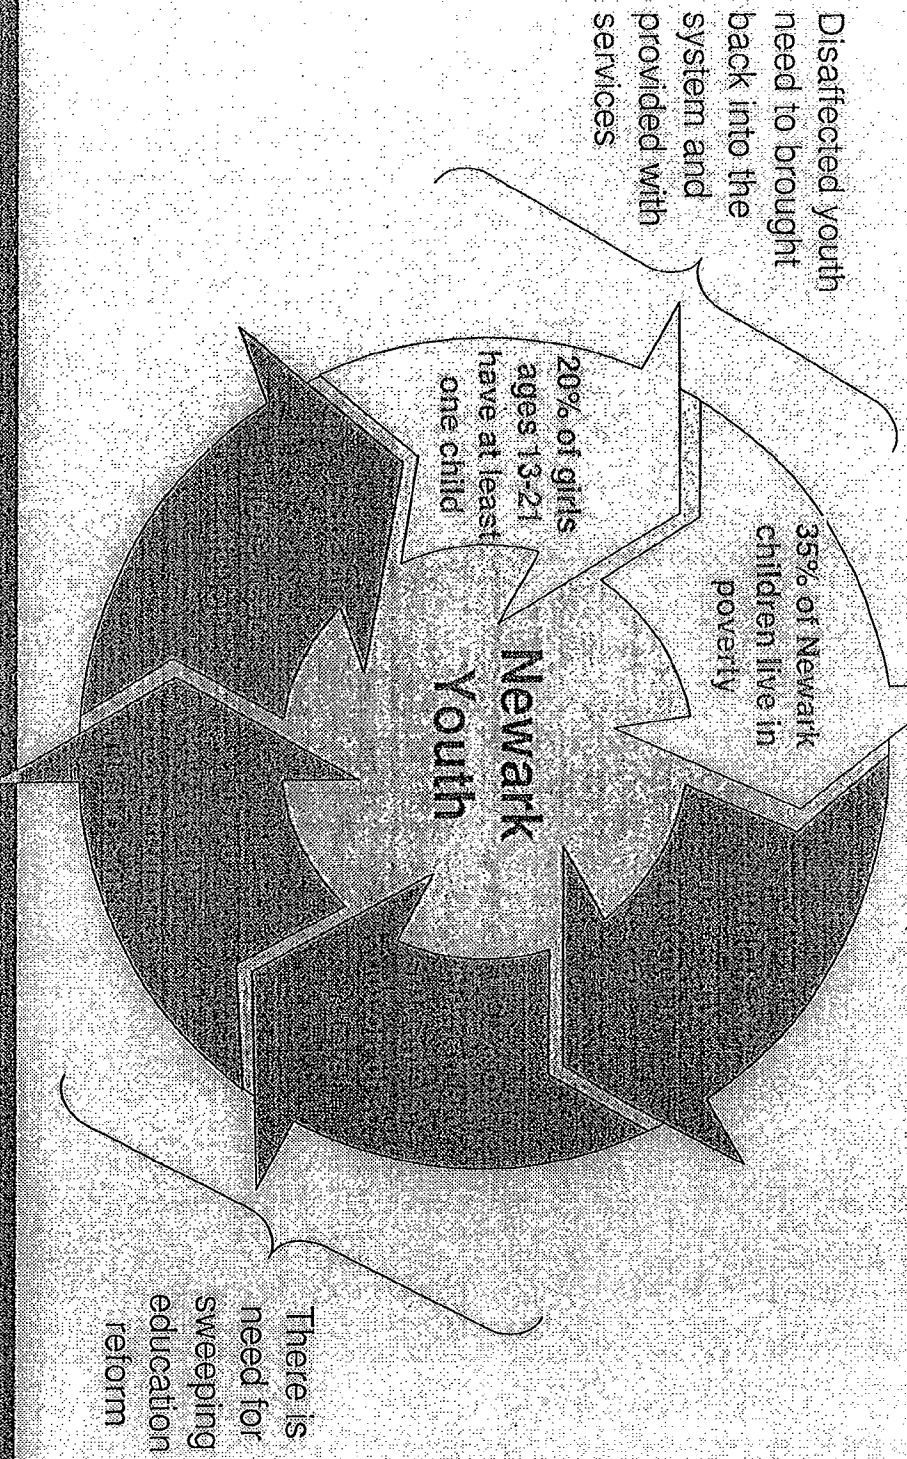

CONFIDENTIAL DRAFT

These problems are not unique in the nation but are particularly severe in Newark

Breaking the cycle of these challenges requires focused attention and support

CONFIDENTIAL DRAFT

Based on an estimate from ES&S, Quinn College

We must act now: improved education outcomes are critical for our children and our city

- **Increased earnings** – Education pays, significantly increasing employment and earnings at all attainment levels. Those with a high school diploma earned 39% more than those who did not graduate from high school. These individual benefits multiply over a lifetime, and are particularly pronounced across racial groups
- **Increased social mobility** – Educational attainment also facilitates social mobility, especially for children from the poorest families. 62% of children from lowest income bracket who became college graduates will escape poverty compared to 32% of children from same bracket without college degrees
- **Reduced probability of incarceration** – Male high school dropouts are incarcerated at nearly 5-8 times the rate of male high school or college graduates. Prison is on average ~2.5 times more expensive than K-12 education – The average spending per year on K-12 is ~10K, while average year of prison is ~25K
- **Increased quality of life and lifespan** – College graduates are nearly half as likely to be obese and a third less likely to smoke than those with less than a high school education; a high school graduate lives on average 6-9 years longer than a high school dropout
- **Collective societal benefits.** A more highly-educated workforce benefits all wage earners. And benefits extend across economic and civic areas, reducing public burden and improving civic participation (e.g., volunteerism).
- **GDP growth.** More notably, the current gaps in US K-12 education achievement – versus other countries, across racial lines and income levels, and across geographical boundaries – exact real economic costs, imposing the equivalent of a “permanent national recession” \$1.4 trillion annually

Current services for these youth have had some impact but there needs to be a new approach

Current aggregate of school-based and community programs/services leave Newark youth under-served

Education

- A significant portion of Newark's curriculum is neither challenging nor engaging and is delivered unevenly, with significant variations from class to class and school to school
- Newark does not have a robust pipeline of quality educators nor does it have the data systems in place to assess retention and attrition rates.
- Professional development for teachers and principals has been uncoordinated, ad hoc, and too rarely connected to accepted standards, curriculum, and instruction
- Majority of parents are not being provided with materials about learning standards for their children

Disaffected youth

- Programs and resources are fragmented and not coordinated across neighborhoods or Wards
- There are many small programs in operation, but these do not have the necessary reach to make a difference outside of their immediate neighborhoods
- It is difficult to measure impact and programs have a range of effectiveness
- It is hard to maintain funding, thus limiting sustainability of programs

NEVDJ will address the needs of Newark youth through a coordinated, holistic approach

NEYDF exists to be this catalyst for change in youth opportunities and outcomes

CONFIDENTIAL DRAFT

Mission:

- To create a national, replicable model for educational and developmental success by achieving within Newark systemic reform that results in demonstrable high achievement for all youth.

Vision:

- We will be the national model for dramatically improving outcomes for youth through a holistic, comprehensive approach.
- We will support and coordinate the highest quality, highest impact programs and approaches to education reform and youth development.
- We will enhance the capacity of Newark schools to drive education reform and youth development.
- We will provide high-impact support for Newark's most vulnerable population, disaffected youth between the ages of 12-21 (estimated as 1 in 4 youth).

NEYDF can augment NPS's reform strategy and priorities

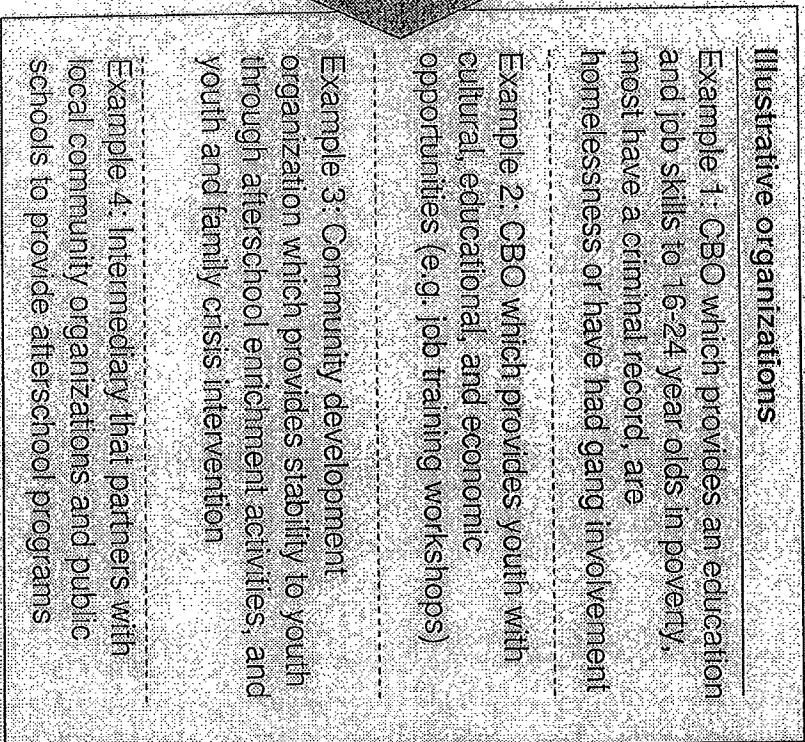

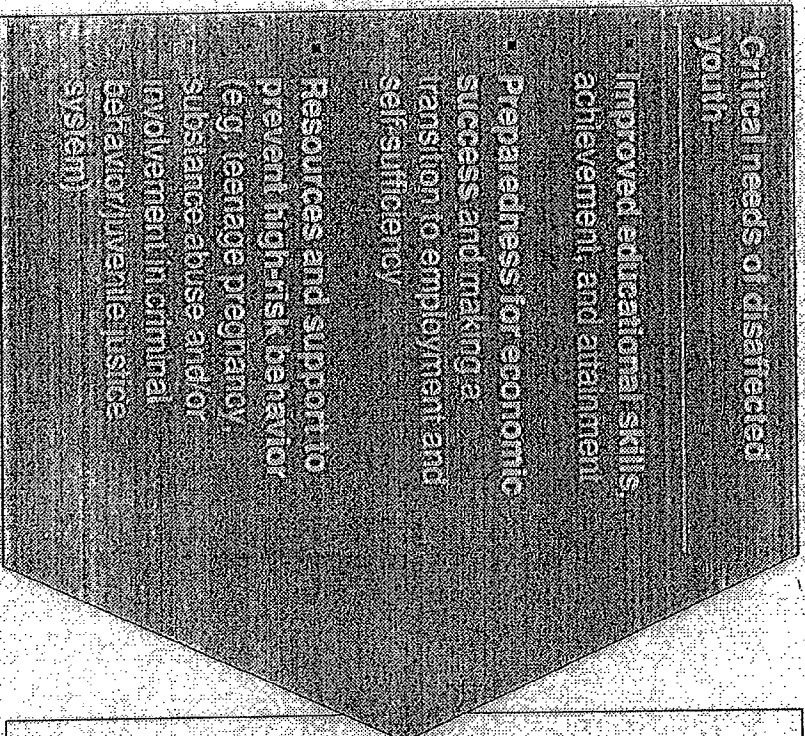

CONFIDENTIAL DRAFT

Select education reform priorities	Description
Expanding financial capital assets	<ul style="list-style-type: none"> Drastically expand pipeline of high-quality educators leading the transformation of schools and further develop existing educators
Merit/performance based contracts	<ul style="list-style-type: none"> Closely tie student performance to teacher compensation providing real rewards for student achievement
Integrate holistic student supports	<ul style="list-style-type: none"> Parental and community linkages to help them better support school reforms, including wrap around services
New school models	<ul style="list-style-type: none"> Increase portfolio of high-quality school options available to families
Accountability systems	<ul style="list-style-type: none"> Build a "best-in-class" student information system that improves data-driven instruction, parent information and educator accountability
Data management system	<ul style="list-style-type: none"> Build a "best-in-class" system for transparent student outcome reporting by school
Public awareness and advocacy	<ul style="list-style-type: none"> Awaken public consciousness to families to act in their own best interests
Infrastructure supports	<ul style="list-style-type: none"> Budget analysis for equitable student funding levels and HR reforms to support high quality human capital

And, drive change through organizations who focus on the critical needs of disaffected youth

CONFIDENTIAL DRAFT

Funding will be allocated to a portfolio of programs across the priority areas

ILLUSTRATIVE

Target funding goal of \$150-250 million over 5 years; \$100-175 million for K-12 education

\$50-75 million for disaffected and at-risk youth

Priorities will likely include:

Sample programs and partners:

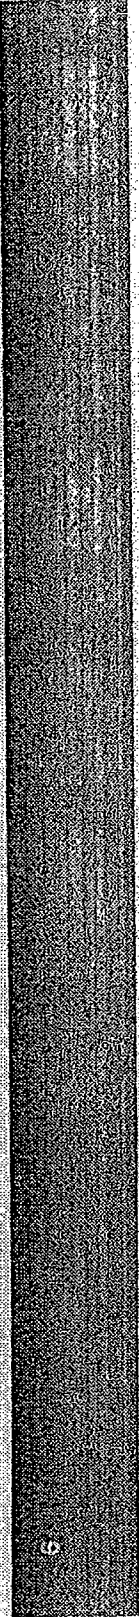

Expanding human capital assets (\$10-25M) <i>(Historically, expand pipeline of educators leading the Transformation of Newark schools)</i>	<ul style="list-style-type: none"> New Leaders for New Schools Building Excellent Schools The New Teacher Project Teach for America
New school models (\$40-70M) <i>Increase portfolio of high quality school options available to families and children</i>	<ul style="list-style-type: none"> KIPP and North Star Young Women's Leadership Academy SEED School Eagle Academy Citizen Schools
Merit performance-based contracts (\$40-60M) <i>Merit, performance-based contracts to reward, compensation pending real rewards for student achievement</i>	<ul style="list-style-type: none"> Recent DC Public Schools contract reforms
Data/accountability systems (\$8-14M) <i>Build a "best-in-class" system for clear and transparent student outcome reporting for parents and educator accountability</i>	<ul style="list-style-type: none"> New York City accountability initiative Insideschools.org
Public awareness and advocacy (\$2-5M) <i>Alleviate public school stress in communities to advocate for quality services for youth</i>	<ul style="list-style-type: none"> Stand for Children Children's Defense Fund
Disaffected youth and at-risk youth programs (\$50-75M) <i>Expand programs and services targeted towards at-risk youth (e.g., incarcerated youth, FOSTA program, etc.) and out-of-school youth</i>	<ul style="list-style-type: none"> YouthBuild Herrick-Martin Year Up Stop Shootin' Mentoring USA

NEYDF will perform multiple roles to attain its goals

CONFIDENTIAL DRAFT

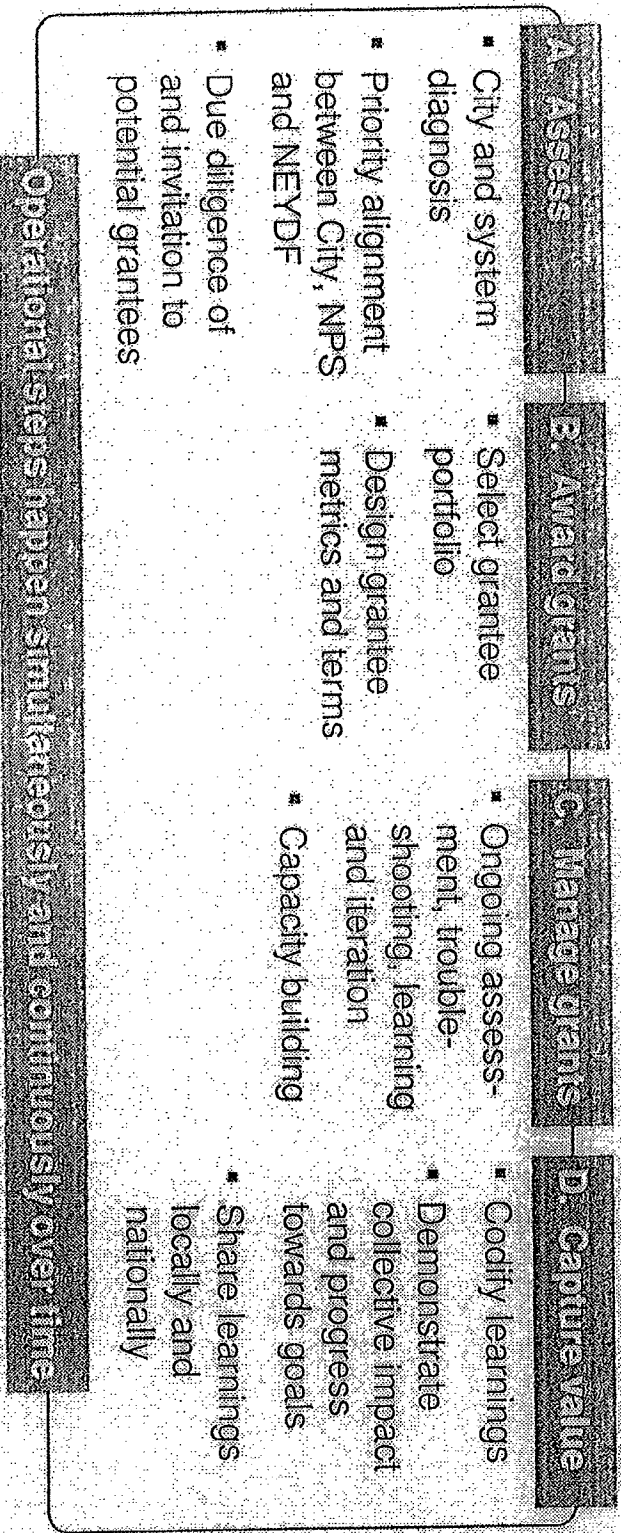

NEYDF roles	Key activities
1 Raise and manage funds	<ul style="list-style-type: none"> Raise and manage private funding to bring more resources to effectively transform the educational and life opportunities of Newark youth
2 Bring, build and continually improve programs	<ul style="list-style-type: none"> Augment city and system resources and capacity to Continuously improve existing offerings through programmatic, human capital and infrastructure investments Spur innovation and fill gaps by incubating new programs and processes Build capacity in Newark to more effectively collect and analyze data
3 Measure and improve learning and program improvement	<ul style="list-style-type: none"> Evaluate what's working (or not) to drive change by Building detailed metrics to evaluate progress and success Gathering, aggregating and translating data among partners and city to understand where successful and where need to iterate Creating a fact base to help codify learning Sharing data locally and nationally
4 Build and leverage local and national networks for impact	<ul style="list-style-type: none"> Bring learning and resources to broader community for greater impact to Build capacity of community organizations through data-sharing, coordination of resources and creation of opportunities for ongoing shared learning (e.g. hold workshops as needed for local organizations to build skills) Embed a sense of ownership for measurable change in Newark Transferring learnings and effective solutions nationally

Goals
Sustainable change in Newark and exportable national model for urban transformation

In order to achieve these goals, NEYDF will have four core operations

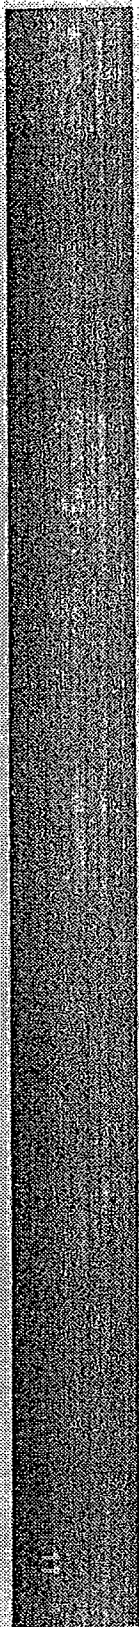

CONFIDENTIAL DRAFT

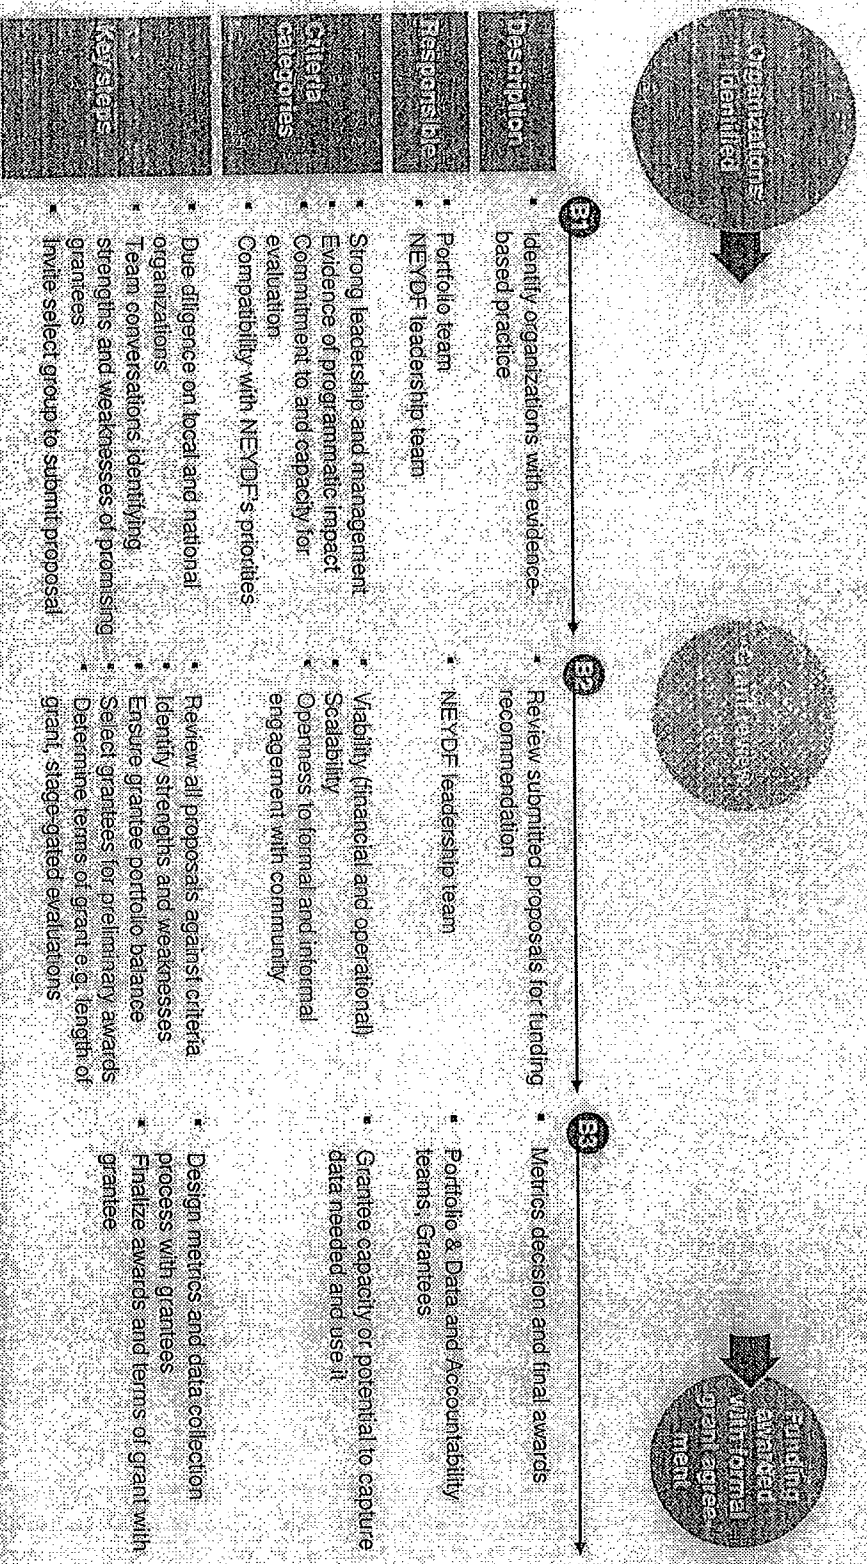

A. Assess: Continuous analysis of Newark youth needs and services

CONFIDENTIAL DRAFT

Description	Responsible	Key steps
<p>1) Comprehensive diagnostic</p> <ul style="list-style-type: none"> ▪ Analysis of youth population, services and school system to gain holistic picture of greatest challenges and opportunities 	<ul style="list-style-type: none"> ▪ NEYDF leadership and key partners (e.g. Superintendent, Advisory Committees, city agency directors) 	<ul style="list-style-type: none"> ▪ Gather quantitative and qualitative data on key metrics on population ▪ Do holistic analysis of data sets with partners to find weakest points and strengths in education system and youth services ▪ Recommend priority funding areas based on need and partner input
<p>2) Direction setting</p> <ul style="list-style-type: none"> ▪ Align with stakeholders and set detailed goals and metrics 	<ul style="list-style-type: none"> ▪ President with Superintendent and City Hall 	<ul style="list-style-type: none"> ▪ Ongoing conversations with City Hall, NPS leadership, city agencies and community partners that are informed by gap analysis ▪ Define and prioritize NEYDF goals and metrics

B. Award grants: Sequenced screening allows an efficient and effective 3-step selection process

C. Manage grants: NEYDF is heavily involved with grantees on an on-going basis

Program Team (Coordinator of grantee needs)

C1 Work with grantees on a regular (frequent) basis

C2 Determine through these meetings and data collection what type of support grantees need

C3 Align grantee needs with consulting support:
▪ In/external expertise
▪ Partnerships

Data and accountability team

C1 Build mechanisms (e.g. databases, electronic collection methods) to support data collection processes

C2 Regularly collect data from grantees (eg through seamless technology)

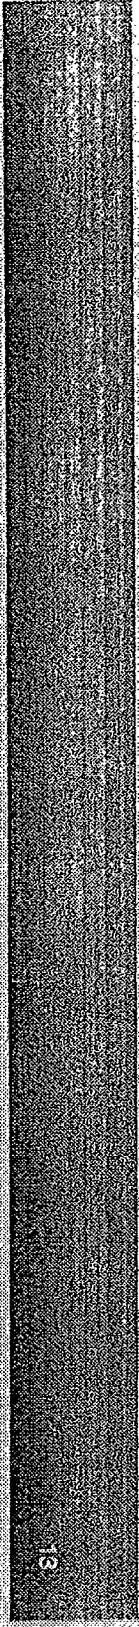

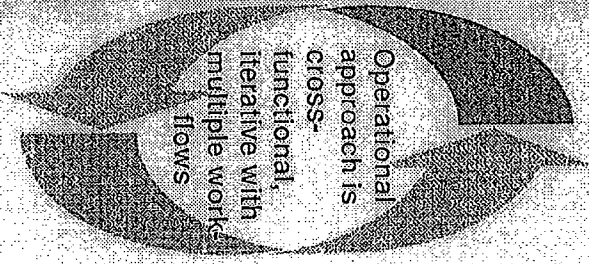

C3 Assess data to understand success and failures, and measure impact

Technology team

C1 Understand data systems of grantees

C2 Build interfaces for grantee reporting mechanisms to collect data across NEYDF

C3 Grantees and NEYDF gain access information about individual grantees and programs, as well as the holistic picture

D. Capture value: Use data and learnings to have an impact on grantees and beyond

Description	Responsible	Key steps
D1 Measure grantee and aggregate performance	Data & Accountability, Portfolio and Technology teams	<ul style="list-style-type: none">Use data systems to aggregate reporting from all grantee organizations<ul style="list-style-type: none">Integrate data systemsAlign metricsCollect Newark city wide data to evaluate achievementsBuild holistic picture of successes and challenges
D2 Codify learnings	Data & Accountability and Portfolio teams	<ul style="list-style-type: none">Use data to determine:<ul style="list-style-type: none">Gaps in support servicesImpact on prioritiesFunding decisionsRefine and shift focus based on learningsIdentify trends and translate into best practices
D3 Communicate and export knowledge	Portfolio and External Relations teams	<ul style="list-style-type: none">Develop methods and timing for formally sharing knowledge e.g. quarterly scorecardExport best practices and successes to the Newark community and the nation via<ul style="list-style-type: none">Press releases, websitePublications e.g. white papers, newslettersWebsite, blogsWorkshops, conferences

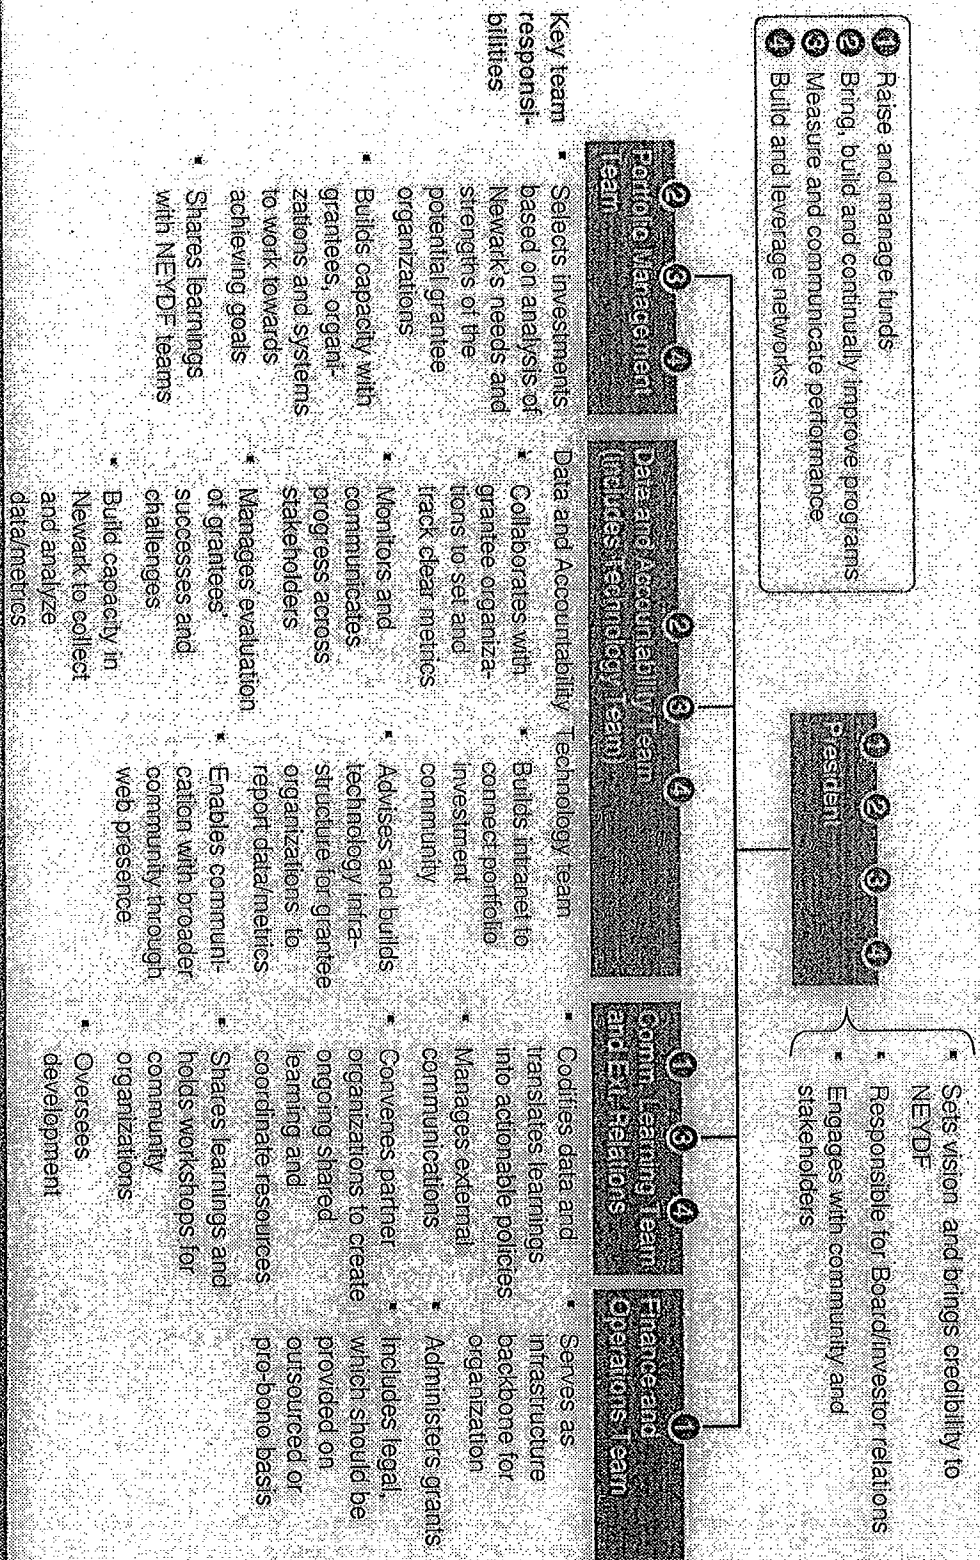

Success for NEYDF will be defined, measured, and shared

Illustrative metrics

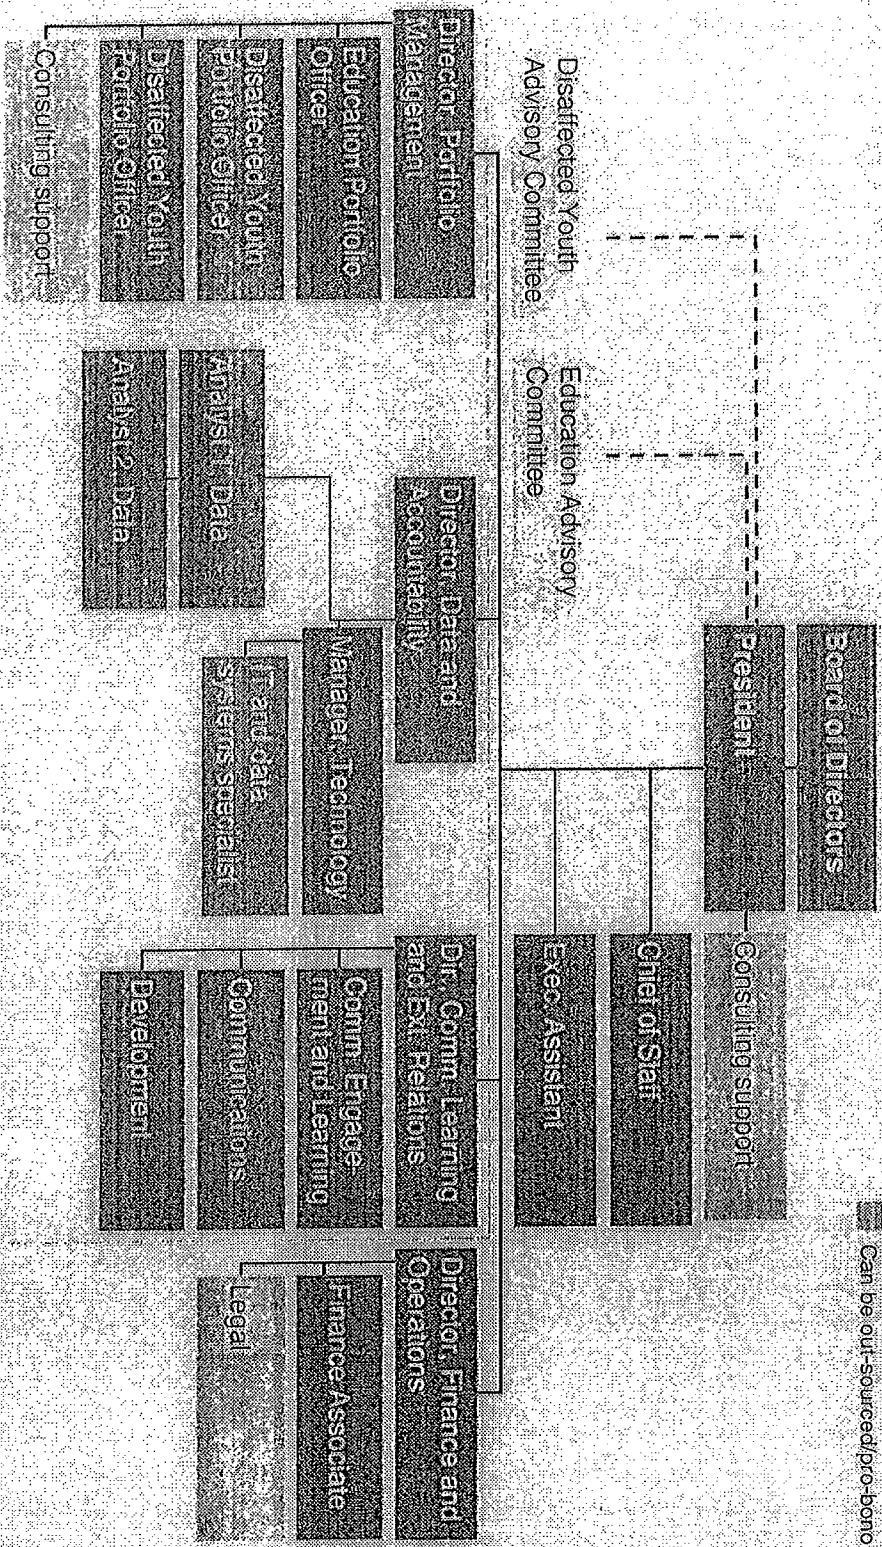

- Increased achievement scores in reading and math
- Increased graduation rates with graduates prepared for higher education and/or career aspirations
- Increased abilities for disaffected youth to reengage in meaningful opportunities and embark on pathways to success
- *Blueprint for national replication across America's urban centers to transform the lives of its youth*

NEYDF will structure teams around its primary roles

And, will maintain a lean structure over time

NEDYF needs a strong and committed Board of Directors

Board of Directors composition

- Small (maximum of 7 - 9 board members)
- Comprised solely of key investors and Mayor as ex-officio member

Responsibilities and expectations

- Provide short-term (5-year) funding needs and create long-term funding opportunities
- Multi-year commitment leading to minimal turnover of members
- Set strategic direction of NEDYF
- Provide ongoing advice and support to the organization and Executive Director
- Give credibility to NEDYF
- Ensure progress towards NEDYF goals
- Critical mass of members active in launching organization successfully
- Committed to transforming Newark and creating national model for urban transformation

And expert Advisory Committees that facilitate collaboration between community and partners

Advisory Committee composition

- Two advisory committees (education and disaffected youth) each with 10-15 core members (e.g. community leaders and external knowledge experts)
- Committee member network of sub-groups of experts and local leaders (e.g. educators, faith based leaders, youth, etc.)

Responsibilities and expectations

- Bring content expertise and local perspective to Board of Directors and NEYDF staff and programs per the request of the President
- Build credibility within community for broader support of NEYDF work
- No voting or legal rights
- Composition will be re-evaluated on a regular (annual) basis
- Meet periodically (quarterly) or as required to support NEYDF initiatives

NEYDF budget reflects gradual program ramp up

CONFIDENTIAL DRAFT

BUDGET SUMMARY (000)		Year 0	Year 1	Year 2	Year 3	Year 4	Year 5

Operating Expense Ratio		N/A	8%	5%	4%	6%	6%

Assumes \$250 million funding disbursed to NEYDF at \$50 million per year

Interest assumed to be 5 year risk-free treasury bill rate and is calculated based on net income per year

Assumes constant FTE size from year 2 although NEYDF may adjust staff size based on new needs

Salaries and benefits comprise over 75% of operating expenses each year

NEYDF is a 501(c)(3) nonprofit organization. All expenses are for normal operations. Assumes NEYDF will have operating salaries in year 1 and 2 with the exception of 1 part-time staff and 1 specialist (6 month salaries for year 1). Why investing now is the right time...

- **Place:** Newark has a powerful alignment of civic and political interests; no other city in America has a platform of federal, state and municipal leadership committed to bi-partisan education reform for urban youth.
- **Scale:** Our youth population is manageable in size, making Newark an ideal laboratory for community change.
- **Smart investing:** NEYDF will build upon proven local and national models of excellence.
- **Foundation:** National organizations have invested in Newark's youth, shown success in recent years and created a climate for reform.
- **Collaboration:** NEYDF will coordinate a critical mass of local and national partners with proven models of excellence to deliver high impact programs and best practices.
